

About MedSource

MedSource is a group purchasing organization dedicated to improving the accessibility, availability, and affordability of quality-assured medicines and other health products for health care providers and the people they serve. Incorporated in Kenya, MedSource is an independently operated subsidiary of Management Sciences for Health, which is based in the United States.

We offer our members a comprehensive and competitive portfolio of pharmaceutical products: medical & surgical consumables and disposables; Hospital & Laboratory equipment and reagents; furniture and a full range of dental equipment and consumables; with pre-negotiated favorable pricing from our partner suppliers.

Services include:

- Group discount negotiations and supplies to provide better pricing and accessibility.
- Supporting training on business skills, pharmacy practices, and inventory management.
- Working with financial partners to facilitate access to credit for members.
- Providing information technology solutions for improved integration and tracking of business transactions.
- Data management for transparency and efficient functioning.

Reducing overall costs while promoting quality.

How we Work

MedSource seeks to reduce costs while guaranteeing quality across the entire healthcare product-related supply chain through Distributors, Manufacturers and our members i.e. Hospitals, Pharmacies, Dentists and Laboratories.

We work with manufacturers and distributors to give our members better access to quality-assured medical products and supplies at pre-negotiated costs. Members can then use the MedSource platform to place their orders directly with the suppliers.

MedSource does not purchase or stock medical supplies on behalf of its members, who can continue to independently operate and conduct business with suppliers, including re-ordering, stocking inventory and routine logistics.

Who can Become a Member

- Hospitals
- Dispensaries
- Community pharmacies
- Pharmaceutical distributors
